

VarioTec s.r.o. - main activities

Our activities are focused in four main branches:

For Nuclear Medicine click [here!](#)

1. Shielding, manipulations devices and equipment for nuclear medicine (production and administration of radiopharmaceuticals – hot cells, laminar flow boxes etc.)

2. Single purpose machines

3. Special assemblies and devices mostly for nuclear research (including design and development)

4. Welding devices for automotive industry

Other activities

Our equipment corresponds with the productional program:

- Cutting of materials: two band saws, one of them being NC, NC cutting machine equipped with plasma torch too
- Welding: carbon steel, stainless steel
- Machining: classical machines (incl. 3 horizontal boring machines) are completed by three CNC machining centers one of them being vertical, two horizontal. Software Surfcam.

- Assembling capacities

- Design office – Solid-Works 3D (we support SAT, STEP, DXF, DWG, IGES etc. formats)
